

Étapes de l'installation de PHP:

```
tar -jxvf php-8.1.28.tar.bz2
cd php-8.1.28
./configure
error: checking for libxml-2.0>= 2.9.0
      pkg-config not found
sudo apt install libxml2 pkg-config
apt search libxml
sudo install libxml
libxml-2.0 not found again
l télécharger libxml2-V2.10.3
cd ..
cd libxml2-V2.10.3
sudo make
sudo make install
cd ..
mkdir build
cd build
cmake ..
error: checking liblzma-dev no
sudo install liblzma-dev
cmake ..
error: compiler python missing
sudo apt-get install python3-dev
cd ..
cd php-8.1.28
./configure
error: sqlite not found
télécharger sqlite-autoconf-3450300/
cd ..
cd sqlite-autoconf-3450300
./configure
sudo make
sudo make install
cd ..
cd php-8.1.28
sudo make
sudo make test
sudo make install
php --version
```
