

Étapes installation mysql:

```
tar -zxvf mysql-8.3.0
cd mysql-8.3.0
mkdir build
cd build
cmake..
sudo apt update
sudo apt install ncurses-base
sudo apt install libncurses5-dev
cmake ..
error: libboost could not found
sudo apt install libboost5-dev
cmake ..
compiler CXX missing
sudo apt install g++
cmake..
checking openssl      no
cmake ..
sudo apt install openssl
sudo apt-get install libssl-dev
extraction
cmake -DOPENSSL-ROOT-DIR-/path/to/openssl
cmake ..
pkg-config not found
sudo apt install pkg-config
cmake ..
sudo make
incompatibilité
mysql --version
sudo apt install mysql-client-core-8.0
cmake ..
sudo make
sudo make install
```
